DISPOSABLE HELIUM CYLINDERS

Adams Gas, are the largest importer of disposable gas canisters. The highly successful range of Fill'n'Away disposable helium gas cylinders are available in 2 sizes, which will inflate up to 30 or 50 9" latex balloons. These kits can be supplied with or without balloons depending on customer requirements.

The "Fill n' Away" kit is safe to use and designed to be user friendly and cost effective. The canisters are also recyclable, which is another great and important benefit to the end user. Customers can simply put it out with the rubbish or take it to their nearest recycling centre.

For those businesses that are looking to order large volumes, own brand

packaging of the product can also be arranged.

Along side the range of rent free refillable helium gas cylinders which are available in 2 sizes, a 9.4L and 20L cylinder, Adams Gas has introduced a unique, 2L refillable bottle, which fills 50 9" latex balloons.

The main aim is for outlets to be able to offer an alternative to the disposable bottle, whereby retailers can offer the refillable option to customers who do not need the larger 9 or 20 litre sizes. Refundable deposits would be required in the normal way but still maintaining the rent-free gas option.
